

CMS ENGAGE SMART DISPLAY

Clear status. Intelligent power. Personalised experience

The CMS Engage Smart Display transforms the desk into an intelligent workplace touchpoint. It shows desk status, welcomes users by name, enables ID card check-in and identity verification with automatic power-on - all in one refined interface. Additional optional features integrate sit-stand height control, and high power USB-C charging to elevate any workspace.

Whether booked via app or activated with an access card, the CMS Engage Smart Display confirms ownership instantly by displaying the user's name and desk number. This removes uncertainty and improves confidence in shared environments.

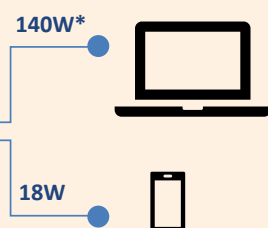

Ideal for hybrid working, Engage supports behaviour-driven workplaces by ensuring desks are clearly assigned, actively used and only powered when needed. The usage dashboard displays
